

e-Learning Solutions

DELIVERING ACCELERATED, EFFECTIVE, ON-DEMAND LEARNING TO THE INTERNATIONAL OIL AND GAS INDUSTRY.

By providing the accessible, just-in-time training that makes it possible to keep pace with rapid changes in the industry, e-Learning has become a vital element in training and developing oil and gas personnel.

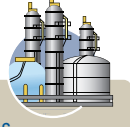

Over the past 35 years, IHRDC has partnered with companies worldwide to develop their personnel into world-class employees. More than ten years ago, anticipating that there would be a growing and urgent need to quickly and continuously upgrade personnel competencies, we were the first to introduce a comprehensive digital knowledge and learning system to the industry.

Today, we offer several innovative, on-demand products that enable companies to increase their employees' skills and knowledge by providing meaningful and relevant desktop training any time, anywhere in the world.

QUICK FACTS ABOUT IHRDC'S e-LEARNING SOLUTIONS

- Interactive and award-winning multimedia e-Learning tailored to the oil and gas industry
- Utilized by over 60 leading organizations worldwide
- Provides learning content across your workforce: Technical, Field Operations, and Business & Support
- Offers a comprehensive and flexible platform for learning
- Delivers over 750 SCORM-certified, on-demand courses
- Integrates with your corporate LMS
- Links directly into Competency Models

The award-winning, interactive International Petroleum Industry Multimedia System (IPIMS.ep) is a comprehensive learning resource that covers all areas of Upstream Petroleum Technology. With over 750 SCORM 1.2 certified courses, IPIMS covers 120 E&P topic areas in:

- Geology
- Geophysics
- Drilling & Completions Engineering
- Production Engineering
- Reservoir Engineering
- Formation Evaluation
- Facilities Engineering
- Project Economics & Planning

Licensed by over 60 companies worldwide, IPIMS provides relevant, on-demand content, courses and assessments designed to link directly to your competency models and personnel development plans.

This new e-Learning product is broad in scope covering technology, operations and economics from upstream to downstream activities. The modules are engaging and timely and are ideal for anyone who wishes to know how the international oil and gas industry “works.” In addition to a comprehensive Industry Overview, the series covers:

UPSTREAM

Upstream Oil and Gas Agreements
Petroleum Geology and the Exploration Process
Drilling and Well Completions
Field Development and Production
Gas Production and Processing

MIDSTREAM

Marketing and Trading of Crude Oil
Crude Oil Transportation and Storage
Gas Transportation and Storage

DOWNSTREAM

Refining and Product Specifications
Marketing and Distribution of Products
Gas Distribution and Markets
Overview of Petrochemicals

This “must have” series is comprised of modular, self-paced courses in fundamental business areas. They have been tailored to the oil and gas industry and designed to help improve the business expertise of personnel working in all areas of the industry. Organizations will find the courses flexible, rigorous, and carefully designed for rapid learning in a corporate environment. Course topic areas include:

- Finance
- Communications
- Human Resources Management
- Project Management
